

MOBILE CUSTOM APPLICATION STACKER

“MEDICAL WASTE” STACKER

MODEL: MWS60

Used and endorsed by Hospitals and Waste Processing facilities throughout North America, the MWS60 is designed to efficiently lift, transport and stack all Waste Carts and containers on the market today.

Combining power lift with easy to maneuver manual push, the MWS60 eliminates the possibility of physical injury to the operator while handling waste containers. Easy to use, it's designed to handle constant heavy duty use, needs no special training to operate, and requires a minimum of maintenance.

Ergonomically designed to ensure the Stackers and Operator cannot be exposed to regulated medical waste, the MWS60 is ideal for indoor or outdoor use. It will increase productivity, eliminate container damage during handling, and work effectively in tight areas.

FEATURES:

Frame: Rugged heavy duty frame constructed of formed and welded steel for extra strength.

Mast: Fabricated with channel steel for greater strength and dependability. Open structure design complete with safety cage offers greater visibility.

Lifting Chains: Unique dual lifting chains are roller style, heavy duty steel exceeding a 6:1 safety factor.

Hydraulic System: Durable cylinder features a chrome plated ram and a relief valve for overload protection.

Forks: Heavy duty steel 1.5" deep X 3" wide X 26" long adjustable forks.

Fixed Straddle Legs: The straddle legs offer complete stability when lifting and transporting the waste containers.

Battery: Features a heavy duty 12 volt, 125 amps/hour industrial strength battery.

Charger: The built-in battery charger is a 10 amp Selenium rectifier with transformer, circuit breaker and overload protection, and plugs into any 110 volt outlet.

Steering: Two 5" Phenolic Swivel Casters located beneath the body of the unit provide complete maneuverability in congested areas.

Wheels: Standard front Wheels are Nylon and 4" in diameter with Roller Bearings

Brake: Features a hand controlled floor lock Brake that secures the unit in place.

Options: 70" Lift Height
Remote Control
Snap-on Platform

SPECIFICATIONS:

Load Capacity:	1,500 lbs.
Load Center:	20"
Lowered Fork Height:	3"
Raised Fork Height:	60"
Overall Mast Height:	70"
Fixed Straddle Legs ID:	38"
Fixed Straddle Legs OD:	44"
Fork Size:	1.5" X 3" X 26"
Fork Adjust OD:	6" - 36"
Weight:	605 lbs.
Swivel Casters:	5" Phenolic
Front Wheels:	4" Phenolic
Battery:	12V/125A heavy duty
Charger:	12V/10A w/overload protect
