

MOBILE WINCH STACKERS

MW500

FEATURES:

The Mobile MW500 Winch Stacker is a versatile piece of equipment that can be used in the upright position or tilted back to climb stairs or obstructions.

Simple to operate, the MW500 features four wheel, easy to maneuver steering and an easy to turn hand winch with an automatic brake system.

Designed to alleviate back bending applications, this unit is perfect for handling light weight packages in tight areas, and comes complete with a safety cage.

MOBILE

MW750

FEATURES:

The Mobile MW750 is a compact truck that is ideal for loading and unloading trucks where docks do not exist.

A favorite with the auto industry for handling engines and transmissions, the MW750 features an easy to operate winch with an automatic braking system, a safety cage, and a floor brake.

This model features adjustable straddle legs which provide an economic alternative for lifting pallets of all sizes without sacrificing ergonomics.
